

Rapid Appraisal of Local Innovation Systems

You wanted to download the RALIS Manual, and now you're getting this. Sorry for disappointing you. What happened is this: We have started a consultancy and training company called **mesopartner**, and RALIS is becoming one of its main products. RALIS is evolving into a complementary product to PACA (see www.paca-online.de). Whereas PACA is a robust, successful methodology to mobilise local communities around the issue of local economic development, RALIS has proven to be a useful as a more targeted tool that looks at leveraging and energising local innovation systems in order to stimulate industrial competitiveness. For more innovation, please have a look at the mesopartner website, www.mesopartner.com.
